Professional Summary

Backend Software Engineer with 3 years of experience building enterprise ERP, healthcare, conference management, and AI-powered SaaS applications using PHP and Laravel. Experienced in designing REST APIs, automation workflows, background job processing, and third-party integrations. Passionate about building scalable, high-performance backend systems and continuously expanding expertise in cloud and distributed technologies.

TECHNICAL SKILLS

Languages: PHP, JavaScript, Java, Python, SQL

Frameworks: Laravel, codeIgniter, Slim, Django, FastApi, Bootstrap, jQuery, React

Databases: MySQL, MongoDB, Redis

Backend Technologies: REST APIs, Microservices, Queues, Laravel Jobs, Cron Jobs, Beanstalkd, Scheduler, Supervisor, Authentication, File Processing, Unit Test Cases

AI & Integrations: Google Gemini API, OpenAI API, Automation Tools, Analytics APIs, Search Console API, Google Business Profile, API Integrations, Payment Gateway, Whatsapp API

DevOps & Deployment: Docker, Linux, AWS, SSH, VPS, Shared Hosting, Git, GitHub, BitBucket

Tools: Postman, Composer, VS Code, Cursor

Work Experience

Backend Developer | October 2025 – Present

Ebrandz Solutions LLP

Responsibilities

- Developed backend modules, REST APIs, and AI automation workflows for Frank AI, an enterprise SEO automation platform built with Laravel.
- Integrated Google Analytics, Search Console, Business Profile, automated Google Review replies, AI services, and other third-party APIs.
- Built AI visibility analysis, SEO optimization, keyword tracking, business listings, and content automation for OpenAI, Gemini, Claude, and AI search platforms.
- Designed scalable background processing using Laravel Queues, Redis, Beanstalkd, Supervisor, Scheduler, Cron, and Docker with retry mechanisms for failed jobs.
- Optimized application performance and participated in deployments, server configuration, and production support across Linux, VPS, and AWS environments.

Software Developer | December 2023 – September 2025

Care Comp

Responsibilities

- Developed ERP, healthcare, and conference management applications using Laravel, PHP, MySQL, JavaScript, jQuery, Bootstrap, and Blade.
- Built REST APIs, business logic, authentication (RBAC), and optimized MySQL queries.
- Integrated payment gateways, email, WhatsApp (AiSensy), and third-party APIs with automated Cron jobs and queues.
- Developed order tracking, participant management, reporting, PDF, barcode, and QR code modules.
- Managed deployments, production support, bug fixes, performance optimization, and responsive UI development.

Web Developer Intern | August 2023 – December 2023

Whizoid Studio

- Built responsive websites using PHP, HTML, CSS and Bootstrap.
- Customized WordPress and Shopify themes.
- Fixed frontend and backend issues.
- Worked with MySQL databases and Git.

Projects

Frank AI – Enterprise AI SEO Automation Platform

Tech Stack: Laravel, PHP, Redis, Docker, Beanstalkd, MySQL, REST APIs, Google APIs

- Developed backend modules for an AI-powered SEO automation platform with Google integrations, AI visibility analysis, and scalable REST APIs.
- Built queue-based background processing using Laravel Queues, Redis, Beanstalkd, Scheduler, and Supervisor with automatic retry and failure handling.

Conference Management System

Tech Stack: Laravel, PHP, MySQL, Bootstrap, JavaScript

- Developed a conference management platform featuring delegate registration, QR check-in, certificate generation, agenda management, and reporting.
- Built REST APIs, role-based access control, bulk email automation, and optimized database operations for large participant datasets.

Laravel RAG Platform (Personal Project)

Tech Stack: Laravel, Qdrant, Docker, Redis, Gemini API, Jobs Queues

- Developing an AI-powered RAG platform for PDF document search using vector embeddings and semantic retrieval.
- Designed document indexing, background processing, and modular backend architecture using Laravel Queues and Docker.

Dots N Pixels ERP

Tech Stack: Core PHP, MySQL, Bootstrap, JavaScript, Payment Gateways, Cron Jobs, WhatsApp Integration

- Developed a full-stack ERP application for inventory, sales, customer management, authentication, and reporting.
- Designed database schema, optimized SQL queries, and built responsive business modules using Core PHP and MySQL.

Education

Bachelor of Science (Information Technology)

- Elphinstone College, Mumbai
- 2019 – 2022
- CGPA: 9.85
